

Pozicija elemenata armature za kupaoanske kade • Positioning of bathtub fitting elements

Na većinu modela kupaoanskih kada moguće je, po želji, tvornički ugraditi i armaturu koja se sastoji od miješalice, tuša i izljeva. U nastavku provjerite moguće pozicije tvorničkih elemenata armature.

Svijetloplavom bojom označene su pozicije za miješalicu, a **tamnoplavom** pozicije za tuš i izljev. Pozicije miješalice, i izljeva i tuša moguće je obrnuti.

For most bathtub models it is possible to request factory-installed fittings consisting of a mixer, a shower, and a spout. Below you can check the positioning options for the factory-installed fittings.

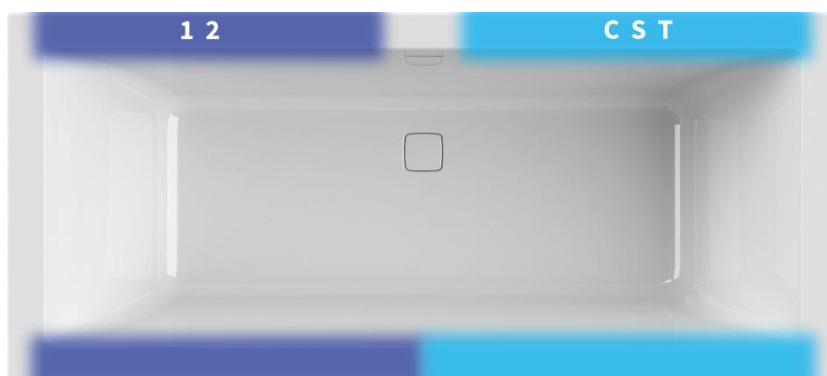

*Mixer positions are marked in **light blue**, and positions for the shower and spout are marked in **dark blue**. The positions of the mixer, and shower and spout are interchangeable.*
